Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 26 January 2004.

2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

1. This communication is in response to the application filed on 1/26/04.

The application has been examined and claims 1-30 are pending in this office action.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21-30 the claimed invention is directed to non-statutory subject matter.

Computer program is used in a computerized process where the computer executes the instructions set forth in the computer program. Claimed invention taken as a whole is directed to a mere program listing, i.e., to only its description or expression, is it descriptive material per se and hence nonstatutory.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-30 are rejected under 35 U.S.C. 102(a) as being anticipated by Charles G. Call ('Call' hereinafter), USPgPub 2002/0165707.

With respect to claim 1,

Call teaches a method for indexing data (para. 0069), comprising:

receiving a token (see para. 0042, Call);

determining whether a data field associated with the token is a fixed width (see para. 0103, Call);

when the data field is a fixed width (see para. 0103, Call), designating the token as one for which fixed width sort is to be performed (see para. 0069, Call); and

when the data field is a variable length (see para. 0010, Call), designating the token as one for which a variable width sort is to be performed (see para. 0103, Call).

As to claim 2,

Call teaches wherein the token is variable width and further comprising:

transforming the variable width token into a fixed width token (see paras. 0076, 0130, Call).

As to claim 3,

Call teaches performing a fixed width sort on one of dual code paths and a variable width sort on the other of dual code paths (see paras. 0038, 0039, Call).

As to claim 4,

Call teaches generating a sort key that includes a token type, a token, a document identifier, a document section, and an offset in a document (see para. 0103 et seq., Call).

As to claim 5,

Call teaches receiving different sections of a document at different times (see para. 0013, Call).

As to claim 6,

Call teaches wherein the different sections include a context section and an anchor text section (see para. 0025, Call).

As to claim 7,

Call teaches generating sort keys for each token of multiple tokens (see para. 0069, Call); and

using the sort keys to create posting lists that simultaneously are ordered by token and by document identifier for each token (see para. 0060, Call).

As to claim 8,

Call teaches using the sort keys to bring together multiple sections of a document (see para. 0013, Call).

As to claim 9,

Call teaches sorting on certain bits of a sort key containing multiple bits (see para. 0104, Call).

As to claim 10,

Call teaches sorting on uppermost bits of the sort key (see para. 0103, Call).

Claims 11-30 have the same subject matter as of claims 1-10 and essentially rejected for the same reasons as discussed above.
